

Ananya Sharma

Senior Data Scientist

Bengaluru, India | ananya.sharma.ds@gmail.com | +91 98450 12233 | linkedin.com/in/ananya-sharma-ds | github.com/ananyasharma

PROFESSIONAL SUMMARY

Data Scientist with 6+ years of experience designing and deploying machine learning models for e-commerce and fintech products. Skilled in translating ambiguous business problems into measurable ML solutions, with a track record of improving forecasting accuracy, reducing churn, and driving revenue through predictive analytics. Comfortable owning the full lifecycle from data exploration to production deployment and stakeholder communication.

TECHNICAL SKILLS

Languages: Python, SQL, R

ML/Statistics: Scikit-learn, XGBoost, LightGBM, Statsmodels, Hypothesis Testing, A/B Testing, Time Series Forecasting

Deep Learning: PyTorch, TensorFlow/Keras, Hugging Face Transformers

Data Engineering: Spark (PySpark), Airflow, dbt, Snowflake, BigQuery

Visualization & BI: Tableau, Power BI, Matplotlib, Seaborn, Plotly

MLOps & Cloud: AWS (SageMaker, S3, Redshift), Docker, MLflow, Git, CI/CD

PROFESSIONAL EXPERIENCE

Senior Data Scientist — Flipkart

Jun 2022 – Present

Bengaluru, India

- Built a customer churn prediction model (XGBoost) achieving 0.89 AUC, enabling targeted retention campaigns that reduced monthly churn by 14%.
- Led development of a demand forecasting pipeline across 2,000+ SKUs using LightGBM and Prophet, cutting stockout incidents by 22%.
- Designed and analyzed 30+ A/B tests on pricing and recommendation features, informing product decisions worth an estimated ██40 crore in incremental annual revenue.
- Mentored a team of 3 junior data scientists and established internal best practices for feature engineering and model validation.
- Partnered with data engineering to migrate legacy batch scoring jobs to an Airflow-orchestrated pipeline, reducing model refresh latency from 24 hours to 2 hours.

Data Scientist — Razorpay

Jul 2019 – May 2022

Bengaluru, India

- Developed a real-time fraud detection model combining gradient boosting and rule-based signals, reducing false positive rate by 31% while maintaining recall.
- Built merchant risk-scoring models used in onboarding decisions, processing 50,000+ applications monthly.
- Created a self-serve analytics dashboard (Tableau) adopted by 8 business teams, cutting ad-hoc reporting requests by 40%.
- Collaborated with engineering to deploy models via REST APIs on AWS SageMaker with automated monitoring and drift detection.

EDUCATION

M.Sc. in Statistics

2017 – 2019

Indian Statistical Institute, Kolkata

Specialization: Applied Statistics and Machine Learning

B.Sc. (Hons) in Mathematics

2014 – 2017

St. Stephen's College, University of Delhi

CERTIFICATIONS

- AWS Certified Machine Learning – Specialty (2023)
- Deep Learning Specialization, DeepLearning.AI / Coursera (2021)
